Portfolio: mohamedrimsan.github.io

PROFESSIONAL SUMMARY

QA & Security Engineer and Information Technology undergraduate with experience in web, mobile and API testing, application security, test automation and remote technical support. Skilled in investigating defects, validating security controls and verifying remediation, with practical exposure to AWS deployments and SOC analyst labs.

TECHNICAL SKILLS

Quality assurance: Functional, regression, integration, end-to-end, exploratory, responsive and UAT testing; test case design; Jira; Agile; Playwright; Selenium; Appium fundamentals.

Security and APIs: Burp Suite, OWASP ZAP, MobSF, Snyc, SonarQube, OWASP Top 10, vulnerability assessment, authentication and authorization testing, Postman, Swagger/OpenAPI, k6, JMeter.

Development and cloud: TypeScript, JavaScript, Python, SQL, Node.js, Next.js, NestJS, PostgreSQL, Prisma, Redis, MongoDB fundamentals, AWS ECS/ECR/CloudShell, Docker, Git, GitHub, CI/CD.

Technical support: Windows, Linux, networking fundamentals, remote support, application and hardware troubleshooting, incident handling, escalation and log analysis.

PROFESSIONAL EXPERIENCE

Tech Bridge Solutions Ltd | Manchester, United Kingdom

Help Desk Representative | Feb 2025 - Present | Full-time, remote

- Provide remote support for application, operating system, connectivity, access, hardware and software issues, guiding users through troubleshooting steps.
- Document incidents and service requests, escalate unresolved issues, and coordinate with teams while keeping users informed through resolution.

SA&O Mente International Sdn Bhd | Moratuwa, Sri Lanka

QA & Security Engineer Trainee | Jul 2026 - Sep 2026 | Full-time

- Tested web and mobile workflows across user, provider, organization and administrator roles, covering registration, OTP, bookings, payments, notifications and customized requests.
- Validated APIs with Postman and Swagger/OpenAPI, including authentication, authorization, input validation, protected endpoints, HTTP responses and rate limiting.
- Assessed application security with Burp Suite and OWASP ZAP; documented reproducible findings and verified fixes for access control, data exposure and input-handling issues.
- Built and executed Playwright and Selenium tests; created reusable k6 scenarios for smoke, redirect and public-page checks, and performed load testing with k6 and JMeter.
- Supported AWS and VPS deployment verification using logs, configurations and API responses; contributed to privacy, risk and production-readiness reviews.

QA & Security Engineer Intern | Mar 2026 - Jun 2026 | Internship

- Performed functional, regression, exploratory and responsive testing; identified UI/UX inconsistencies, workflow defects and API integration issues.
- Reported and retested defects in Jira, supported security analysis and remediation checks, and participated in UAT, Agile stand-ups and release reviews.

SELECTED TECHNICAL PROJECTS

AssureX | Quality, Security and Risk Assurance Platform

- Designed and developed a full-stack platform for test-case execution, vulnerability and asset management, remediation tracking, CVSS v3.1 scoring and risk reporting.
- Implemented role-based access control, multi-factor authentication, audit logging, PDF reporting and automated end-to-end tests.

Technologies: Next.js, TypeScript, PostgreSQL, Prisma, Playwright, Docker, JWT.

VeriGuard | QA Automation and Testing Platform

Active development

- Developing web, mobile and API testing workflows with requirement analysis, positive and negative scenarios, regression support and health monitoring.
- Building credential protection using AES-256-GCM alongside project, environment and task lifecycle management.

Technologies: TypeScript, Next.js, NestJS, PostgreSQL, Prisma, Redis, BullMQ, Docker, Jest.

MailForge | Email Campaign and Tracking Platform

Active development

- Developed campaign, template, attachment, SMTP and contact-management features with email tracking, delivery reporting and background processing.
- Worked across frontend, backend and worker services; troubleshoot database migrations and email delivery, and tested subscription and payment workflows.

Technologies: Next.js, Node.js, TypeScript, PostgreSQL, Prisma, Redis.

EDUCATION

BSc (Hons) in Information Technology

The Open University of Sri Lanka | Nov 2023 - Nov 2027 (expected)

Current CGPA: 3.46 | Member, iTeam

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

Google Cybersecurity Professional Certificate | Google / Coursera | Jan 2026

Junior Cybersecurity Analyst Career Path | Cisco Networking Academy | Jul 2025

Software Testing and Automation Specialization | University of Minnesota / Coursera | In progress

Introduction to Cybersecurity | Cisco Networking Academy

ISO/IEC 27701:2025 Lead Auditor Training | Privacy information management, governance, risk and audit principles

CYBERSECURITY LABS AND SIMULATIONS

LetsDefend SOC Analyst Labs: Practised security alert triage, log and phishing analysis, web-attack detection, threat investigation and incident-response workflows.

Commonwealth Bank Cybersecurity Job Simulation: Completed Splunk-based investigation, suspicious-pattern analysis, evidence collection, incident-response and web-vulnerability assessment activities.

ADDITIONAL EXPERIENCE

Inventory Manager & Cashier | Bilaal Kidz | Jan 2022 - Jan 2024

Managed stock, POS transactions and reconciliation; helped implement a barcode-based inventory process.

Administrative Assistant | Care and Cure Medical Center | May 2021 - Nov 2021

Maintained records, handled inquiries and supported digitization of administrative workflows.
