PROFESSIONAL SUMMARY

IT professional and BSc (Hons) Information Technology undergraduate with experience in remote technical support, incident management, troubleshooting, and user assistance. Skilled in diagnosing operating system, application, connectivity, and access-related issues, with additional experience in API diagnostics, QA testing, security assessment, and deployment verification. Seeking opportunities in IT Support, Service Desk, Technical Support, and Application Support.

TECHNICAL SKILLS

IT & Technical Support: Remote user assistance; Windows and Linux; application, operating-system, account-access, hardware and connectivity troubleshooting.

Service desk operations: Incident and service request logging; issue triage, escalation, follow-up, documentation, user communication and problem solving.

Networking, Systems & Cloud: TCP/IP, DNS and HTTP/HTTPS fundamentals; log review; AWS and VPS deployment checks; Git/GitHub; Docker.

Application Diagnostics & Quality: Postman, Swagger/OpenAPI, Jira, functional and regression testing, defect reproduction, UAT, Playwright and security-testing tools.

PROFESSIONAL EXPERIENCE

Tech Bridge Solutions Ltd | Manchester, United Kingdom

Help Desk Representative | Full-time: Feb 2025 - Feb 2026 | Part-time: Mar 2026 - Oct 2026 | Remote

- Provided remote technical support for application, operating system, network connectivity, user access, hardware, and software issues.
- Diagnosed and troubleshot technical problems, guiding end users through clear, step-by-step solutions.
- Recorded and maintained incidents, user complaints, and service requests, ensuring accurate documentation and timely follow-up.
- Escalated unresolved technical issues to relevant support teams, providing troubleshooting details and maintaining communication with affected users.
- Assisted users with routine technical inquiries, application functionality, and system access to minimize service disruptions.
- Maintained professional communication with remote users, ensuring a positive support experience and effective issue resolution.

SAĜO Mente International Sdn Bhd | Moratuwa, Sri Lanka

QA & Security Engineer Trainee | Jul 2026 - Sep 2026 | Full-time

- Investigated web/mobile issues, reproduced defects and coordinated fixes through Jira and developer feedback.
- Analyzed API requests, access failures, response codes and data flows with Postman and Swagger/OpenAPI.
- Supported AWS/VPS deployment checks through application logs, environment validation and release testing.

QA & Security Engineer Intern | Mar 2026 - Jun 2026 | Internship

- Tested web/mobile application workflows, identified integration and functional issues, and documented reproducible defects.
- Supported UAT, release checks and fix verification with development teams.

SELECTED TECHNICAL PROJECTS & PRACTICAL TRAINING

ServiceDesk Simulator | IT Support & Service Desk Practice

Ongoing simulation-based training

- Practicing simulated tickets, structured troubleshooting, incident documentation, escalation decisions and user communication.

MailForge | Email Campaign and Tracking Platform

Active development

- Developed SMTP, contact, delivery and reporting features; investigated worker and database issues.
- Troubleshot email delivery and database migrations; validated app and subscription workflows.

Technologies: Next.js, Node.js, TypeScript, PostgreSQL, Prisma, Redis.

VeriGuard | QA Automation and Testing Platform

Active development

- Developing API and application validation workflows with health monitoring, task tracking and environment management.
- Building credential protection and background task processing.

Technologies: TypeScript, Next.js, NestJS, PostgreSQL, Prisma, Redis, BullMQ, Docker, Jest.

AssureX | Quality, Security and Risk Assurance Platform

- Designed and developed a full-stack platform for test-case execution, vulnerability and asset management, remediation tracking, CVSS v3.1 scoring and risk reporting.
- Implemented role-based access control, multi-factor authentication, audit logging, PDF reporting and automated end-to-end tests.

Technologies: Next.js, TypeScript, PostgreSQL, Prisma, Playwright, Docker, JWT.

EDUCATION

BSc (Hons) in Information Technology

The Open University of Sri Lanka | Nov 2023 - Nov 2027 (expected)

Current CGPA: 3.46 | Member, iTeam

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

IT Support & Infrastructure: Google IT Support Professional Certificate; Technical Support Fundamentals; The Bits and Bytes of Computer Networking; Operating Systems and You: Becoming a Power User; System Administration and IT Infrastructure Services; Practical Help Desk (TCM Security); Cisco Networking Basics; Cisco Computer Hardware Basics.

Cybersecurity & Compliance: Google Cybersecurity Professional Certificate; ISO/IEC 27701:2025 Lead Auditor Training; Cisco Junior Cybersecurity Analyst Career Path; Cisco Introduction to Cybersecurity.

CYBERSECURITY LABS AND SIMULATIONS

LetsDefend SOC Analyst Labs: Alert triage, log review, technical investigation and incident-response exercises.

Commonwealth Bank Job Simulation: Simulated log investigation, evidence collection and incident-response tasks.

ADDITIONAL EXPERIENCE

Inventory Manager & Cashier | Bilaal Kidz | Jan 2022 - Jan 2024

Managed stock, POS transactions and reconciliation; helped implement a barcode-based inventory process.

Administrative Assistant | Care and Cure Medical Center | May 2021 - Nov 2021

Maintained records, handled inquiries and supported digitization of administrative workflows.
